

Circle

Circle

Three words began to exemplify the approach taken by designer David Cameron when he first envisaged Circle Design. He wanted a piece of furniture that was *simple, functional and beautiful* for his work as an interior architect. He began to design with the notion of helping workflow without distraction. This aim allows for a better focus on the task at hand leading to a boost in productivity and a calmer workspace environment.

Circle's first desk 'Oosoom' is the purest realisation of that initial notion. Its full-width drawer allows the users to put 'objects out of sight, out of mind' as they concentrate solely on their work.

● **Top:** 'Artic White' seamless acrylic hard surface.

Drawer: High-end slow close mechanics with ivory synthetic leather insert.

Legs: Solid Oak with clear coat protection.

Oosoom Range

Introducing the first range of Circle furniture. The Oosoom Range has been in development for the last three years and is aimed for commercial fit-outs and residential use. We have used the most appropriate materials for our pieces, hard wearing Fenix, Polytec, Hi-Macs acrylics and Birch Plywood for surfaces as well as solid Oak and powder coated steel for tops and legs. All our furniture aspires to the notion of clean workspaces and tidy home offices being simple, functional and beautiful.

The Oosoom Premium desk was created for modern-day designers and thinkers. Its full-length drawer allows for items and papers to be stowed underneath keeping the work surface clear and distraction free. The removable top allows monitor cable to run through the bodies cavity for multiple power outlet options. The Oosoom desk comes in the Premium and Classic.

●
Top: 'Arctic White' seamless acrylic hard surface.
Legs: Solid Oak with clear coat protection.

● **Drawer:** High-end slow close mechanics with ivory synthetic leather insert.
Drawer measurements: W 1650 x H 90 x D 400 mm

● **Top detail:** 'Arctic White' seamless acrylic hard surface.
Legs detail: Solid Oak with clear coat protection.

● **Drawer:** High-end slow close mechanics with ivory synthetic leather insert.
Drawer measurements: W 1650 x H 90 x D 400 mm

●
Top: Birch Plywood with clear coat polyurethane paint finish with recessed hard surface acrylic monitor wear pad.
Legs: White powder coated steel.

●
Drawer: High-end slow close mechanics with ivory synthetic leather insert.

● **Top detail:** Recessed hard surface acrylic monitor wear pad with oversized lead output.
Opposite page: 'Continuous grain' Birch plywood with clear coat polyurethane paint finish.

Rectangular Multi

The Rectangular Multi comes in many sizes with an array of beautiful surface options that are durable to a multitude of environments. A table that suits any space and purpose.

●
Top: Fenix Nano Tech laminate in matt colour range with Birch Plywood.
Legs: White powder coated steel.

Circular Multi

Like the Rectangular Multi, the Circular Multi is suitable for many purposes and stands alone as a functional table. Coming in many sizes with an array of beautiful surface options that are durable to a multitude of environments.

●
Top: Fenix Nano Tech laminate in matt colour range with Birch Plywood.
Legs: White powder coated steel.

Cuboid

Stylish and minimal, the Cuboid can stand out or blend into any environment. Unbelievably functional, aesthetically beautiful.

● **Top:** Fenix Nano Tech laminate in matt colour range with Birch Plywood.

Body and drawer fronts: Birch Plywood with clear coat polyurethane paint finish.

Legs: White powder coated steel.

● **Drawers:** A combination of high end slow close with push catch mechanics. Ivory synthetic leather inserts.

● **Detail:** 'Continuous grain' Birch Plywood with clear coat polyurethane paint finish.
Opposite: Fenix Nano Tech laminate in matt colour range with Birch Plywood.

- ## Simple

Practicality and a reduction of form. A minimalist approach to modern materials produces a cleaner, simpler and ultimately, more durable piece of furniture. Keeping our design and build process simple is key in the production and usability of our furniture. A form derived simply from the function of our design.

- ## Functional

Ease of use and purposefulness. We use modern materials specifically for their benefit and wear. This may sound like quite a utilitarian approach; it's our way of filtering out the unnecessary and focus solely on the end use of our furniture.

- ## Beautiful

Having both a reductive and utilitarian approach to design leaves our furniture with a refined aesthetic. Beauty comes solely from their purpose; the function they serve. This way we believe beauty is predetermined by simple and functional design, it is the outcome of our research and development, prototyping and refinement that makes a Circle piece of furniture.

Vinyl Stack

Circles ethos is like vinyl to the music lover. It's in the process. A moment for yourself to sit and take in the sounds. The Vinyl Stack was designed to perfectly display your treasured collection.

- **Body:** Birch Plywood with clear coat polyurethane paint finish.
- Legs:** White powder coated steel.

Circle has prototyped many types of materials over the past three years in search of the right combination of functionality, durability, and style when it comes to the construction and finishes. The following materials pages will give insight into the attention to detail and quality of build that goes into each piece of Circle furniture.

Fenix NTM

FENIX NTM® is a super opaque nanotech material used by Circle for surfaces. It is an innovative interior design product, created by Arpa Industriale, that combines elegant aesthetic solutions with state-of-the-art technological performance. With low light reflectivity, its surface is extremely opaque, anti-fingerprint and can thermally heal any superficial micro-scratches. It also features a very pleasant soft touch. The swatch on this page represents the colours Circle furniture can be surfaced in.

Key features

Low light reflectivity

Thermal healing of superficial microscratches

Anti-fingerprint

Soft touch

Resistance to scratches and abrasion

Resistance to dry heat

High resistance to acid solvents and reagents

Enhanced anti-bacterial properties

0029 Bianco Malé

0030 Bianco Alaska

0032 Bianco Kos

0725 Grigio Efeso

0752 Grigio Antrim

0717 Castoro Ottawa

0719 Beige Luxor

0748 Beige Arizona

0749 Cacao Orinoco

0751 Rosso Jaipur

0718 Grigio Londra

0720 Nero Ingo

0724 Grigio Bromo

0750 Verde Comodoro

0754 Blu Fes

Acrylic

Circle use 'Arctic White' HI-MACS® by Gunnersen, an advanced polymer resin technology developed by LG Hausys®. The acrylic resin acts as a reinforcing agent, adding extra strength while creating a non-porous surface that can be repaired if scratched or chipped. The acrylic also allows for seamless joins giving every surface a sleek, smooth finish.

Polytec

Inspired by industrial raw materials but without the constraints of weight, Circle uses surface laminate 'White Cement' – a pale, white, realistic concrete with soft grey shadow, 'Grey Cement' – a mid-toned, grey, realistic concrete with mid grey shadow and 'Dark Cement' – a dark, cool grey, realistic concrete with near black shadow. These lightweight alternatives to concrete provide a true raw concrete appearance without the need for reinforcing steel, curing and casting.

Birch Plywood

Circle uses Birch Plywood because of its warmth and natural markings. Plywood uses more of the log than other timber which makes it much more effective as a resource. Also, kilo for kilo it is stronger than steel, as well as being a longer lasting more durable timber.

Solid Oak

One of the most popular timbers to use in fine furniture making, Circle Oak has great strength and hardness with very appealing grain markings.

Steel

A simple and trusted way to make bases, legs and frames Circle uses Square Hollow Steel (SHS) and Rectangle Hollow Steel (RHS) for all column based products. The SHS / RHS in the Oosoom range is powder coated white to finish.

Synthetic Leather

For the interior of Circle furniture drawers an ivory synthetic leather is used. Being 100% polyester the synthetic leather is very durable: resistant to most chemicals, stretching and shrinking, wrinkle resistant and abrasion resistant with a soft touch.

Designer

David Cameron finds creativity within fine furniture design and customer conscious functionality. Hugely influenced from his steel works background and over 20 years in engineering, retail design and building, as-well as growing up in North England's industrialised towns, David has forged a reputation with his signature organic feel of merging steel and wood along with the latest advances in material technologies.

As principal designer & director of Circle Design and Sydney shop-fitout company, DB Projects, David's work can be seen nationally, including in the iconic Westfield and David Jones department stores as-well as Sydney Airport.

Oosoom Premium

●
Top: 'Arctic White' seamless acrylic hard surface.

●
Drawer: High-end slow close mechanics with ivory synthetic leather insert.

●
Legs: Solid Oak with clear coat protection.

●
Dimensions: W 1800 x H 740 x D 750 mm.

●
Dimensions (open drawer): W 1800 x H 740 x D 1120 mm.

Oosoom Classic

●
Top: Birch Plywood with clear coat polyurethane paint finish with recessed hard surface acrylic monitor wear pad.

●
Drawer: High-end slow close mechanics with ivory synthetic leather insert.

●
Legs: White powder coated steel.

●
Dimensions: W 1800 x H 740 x D 750 mm.

●
Dimensions (open drawer): W 1800 x H 740 x D 1120 mm.
